Secure lifetime income

You can supplement your retirement income with monthly payments that are guaranteed for life.

Lincoln ProtectedPay® Select

Lincoln ProtectedPay Select provides protected income payments. That means they'll never decrease and will last the rest of your life — no matter how the market performs. Your Protected Annual Income payments are determined by various factors including your age, whether the income is just for you or you and your spouse, your account value, when you start taking income, how long you wait to begin payments and your Protected Annual Income rate. This benefit is included with the product at issue, but you do not need to start taking income immediately.

Protected Annual Income rate and Deferral Bonus

Your initial Protected Annual Income rate is based on your age at issue. For each full year you wait to take income, a Deferral Bonus will be added to the initial income rate.

For current income rates, go to [LFG.com/LLARates](https://lfg.com/LLARates).

Leave a legacy

Choose one of three options at contract issue:

1

Estate LockSM Death Benefit

Your beneficiary will receive the full investment amount or the account value, whichever is greater. Income payments will not reduce the death benefit.¹

2

Guarantee of Principal Death Benefit

Your beneficiaries will receive at least the full amount of your investment (adjusted for withdrawals), no matter what happens in the market.

3

Account Value Death Benefit

Your beneficiaries will receive your account value. Available for clients ages 76 – 85.

¹ Deferral Bonus rates and Protected Annual Income rates are based on the younger life for joint contracts.

² Protected Annual Income (PAI) and required minimum distribution (RMD) withdrawals do not reduce the guaranteed value of the *Estate LockSM* Death Benefit. Excess withdrawals reduce the guaranteed value proportionally. If your account value reaches \$0, your income will continue for life and your beneficiary will receive your initial investment adjusted for all withdrawals (if greater than \$0).

Lock in option

The **Secure Lock+**® feature allows you to lock in your current account value each year of an indexed term. The locked in account value of your indexed account will not move due to any market fluctuations, positive or negative, until your next monthly contract anniversary. At your next monthly contract anniversary date, your indexed account will reset with a new protection level and rate and a new starting index value. Or you can opt to delay the reset until the next indexed anniversary.²

¹This rate is automatically included in the value credited to the account regardless of market performance.

²Secure Lock+® is not available on dual plus or annual lock accounts or during the income phase of the *Lincoln ProtectedPay*® rider.

Lincoln Level Advantage 2 IncomeSM index-linked annuity is a long-term investment product designed for retirement purposes. There are no explicit fees associated with the index-linked account options available. Annuities are subject to market risk including loss of principal. Withdrawals are subject to ordinary income tax treatment and, if taken prior to age 59½ in nonqualified contracts, may be subject to an additional 10% federal tax.

Index-linked annuity products are complex insurance and investment vehicles. Please reference the prospectus for information about the levels of protection available and other important product information.

Any distribution or transfer from an indexed account (other than on the term end date) is based on the interim value of each indexed segment. This value is based on a formula and may not correspond to the current performance of the index you selected. Any distribution or transfer during a term will have a negative impact on the value at the end of the term. This reduction could be larger than the dollar amount of the distribution or transfer. See prospectus for details.

The risk of loss occurs each time you move into a new indexed account. If the negative return is in excess of the protection level selected, there is a risk of loss of principal. Protection levels that vary based on the index, term, and crediting strategy selected are subject to change and may not be available with every option. Please see the prospectus for details.
