

State Street U.S. Bond Index Non-Lending Series Fund Class K

Fact Sheet
Defined Contribution

31 December 2024

State Street U.S. Bond Index Non-Lending Series Fund Class K ("Class K") represents units of ownership in the State Street U.S. Bond Index Non-Lending Series Fund (the "Fund").

The Fund seeks to offer broadly diversified, low cost exposure to the overall U.S. bond market.

Investment Objective

The Fund seeks an investment return that approximates as closely as practicable, before expenses, the performance of the Bloomberg U.S. Aggregate Bond Index (the "Index") over the long term.

Investment Strategy

The Fund is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. The Fund will not necessarily own all of the securities included in the Index.

The Fund may attempt to invest in the securities comprising the Index, in the same proportions as they are represented in the Index, in limited cases where we believe it is practical to do so. However, due to the diverse composition of securities in the Index and the fact that many of the securities comprising the Index may be unavailable for purchase, it may not be possible for the Fund to purchase some of the securities comprising the Index. In such a case, SSGA will select securities for the Portfolio that SSGA expects will provide a return comparable to that of the Index.

SSGA expects that it will typically seek to replicate Index returns for the Portfolio through investments in the "cash" bond markets - actual holdings of debt securities and other instruments - rather than through "notional" or "synthetic" positions achieved through the use of derivatives, such as futures contracts or swap transactions (except in the unusual case where SSGA believes that use of

derivatives is necessary to achieve an exposure that is not readily available through the cash markets).

The Fund's return may not match the return of the Index. There may be an increased variance between the return of the Fund and the return of the Index due to differences between the Index pricing source and the source utilized to price the Fund.

Key Facts

- Managed using an indexing strategy
- Does not normally use futures or other derivatives to create "notional" or "synthetic" index exposures
- May invest in other investment pools, including those managed by SSGA and its affiliates
- The Fund is not leveraged
- Will not sell securities short

This fact sheet provides summary information about the Fund. It should be read in conjunction with the Fund's applicable Strategy Disclosure Document, which is available upon request. Certain supplemental information may be rounded and may result in the total not adding up to 100.

The top holdings are presented to illustrate examples of the securities that the Fund has bought and may not be representative of the Fund's current or future investments. In the case of fixed income and cash funds the securities are aggregated and shown at the issuer level. The top holdings do not include other assets or instruments that may be held by the Fund including, for example and not by way of limitation, cash or cash equivalents and derivatives such as futures, options and swaps. The figures presented are as of the date shown above, do not include the Fund's entire investment portfolio, and may change at any time.

The portfolio turnover rate is as-of the prior fiscal year-end ("FYE"). It is calculated consistent with Form N-1A by dividing the lesser amounts of purchases or sales of portfolio securities (i.e., underlying Fund shares) for the fiscal year by the monthly average value of the portfolio securities owned by the Fund during the fiscal year.

Characteristics are calculated using the month-end market value of holdings of the representative account, and where averages are shown these reflect the market weights of the securities in the representative account. For beta and standard deviation, if shown, these reflect Composite month-end returns. Characteristics are as of the date indicated, are subject to change, and should not be relied upon as current thereafter.

Market data, prices, and estimates for characteristics calculations provided by Bloomberg Portfolio Risk and Analytics Schedule of Services (PORT+). Average Credit Quality reflects market value weight of all the rated securities held by the portfolio (excludes unrated securities) using the middle rating provided by either S&P, Moody's and Fitch or lower if only two agency ratings are available. All other portfolio data provided by SSGA. Fixed income asset class and country reporting based on Bloomberg indices.

Important Message About Risk

Investing involves risk including the risk of loss of principal. Bonds generally present less short-term risk and volatility than stocks, but are subject to: interest rate risk (as interest rates raise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually more pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss. In addition, the Fund may use derivative instruments which may involve additional risks such as potential illiquidity of the markets, credit risk, currency risk, leverage risk and counterparty risk. There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such. The Fund is a bank-maintained collective investment fund maintained and managed by State Street Global Advisors Trust Company (SSGA). SSGA is a limited purpose trust company established under the laws of the Commonwealth of Massachusetts. In reliance

upon an exemption from the registration requirements under the federal securities laws, investments in the fund are not registered with the Securities and Exchange Commission ("SEC") or any state securities regulator. In reliance upon an exclusion from the definition of an investment company under the Investment Company Act of 1940, as amended, the fund is not registered with the SEC as an investment company. SSGA and its fiduciary activities are overseen by the Massachusetts Department of Banks (MA DOB) and, as a subsidiary of State Street Corp., a bank holding company, the Federal Reserve. Neither the MA DOB nor the Federal Reserve have reviewed or approved the Fund or the information contained herein. The Fund is offered to certain eligible defined contribution plans pursuant to the Declaration of Trust of the State Street Global Advisors Trust Company Investment Funds for Tax Exempt Retirement Plans, which establishes SSGA's powers, authority and obligations in respect of the investment, administration and operation of the Fund as well as the eligibility, rights and obligations of each plan participating in the Fund. Fee Disclosure

The Fund seeks to achieve its investment objective by making direct investments in securities or by making investments in other investment funds, including those managed by SSGA and its affiliates ("SSGA Funds"). The Fund indirectly bears a proportional share of the fees and expenses of the SSGA Funds in which the Fund invests ("Indirect Expenses"), which may include, among others, Fund's administration, investment management, audit, index and legal fees of the SSGA Funds. Additionally, the Fund incurs direct fees and expenses ("Direct Expenses"), which may include, among others, the Fund's administration, investment management, audit, index, service and legal fees. For Class K, the investment management fee is included in the Direct Expenses. The Indirect Expenses combined with the Direct Expenses form the Total Annual Operating Expense Ratio ("TAOER"). The TAOER of Class K will equal .04% annually. You should contact your Plan Administrator for a complete description of the fees and expenses applicable with Class K units of the Fund, including the shareholder servicing fees. Transaction costs (including, for example, brokerage costs, and taxes, if any) are not reflected in the TAOER but are reflected in the net performance returns of the Class K units of the Fund. In the ordinary course, the investment manager does not assess Transaction Charges

in connection with the purchase or redemption of units of the Fund. To the extent the Fund invests in one or more SSGA Funds, the Fund itself may incur such Transaction Charges as a result of such investment, which will be reflected in the Fund's net asset value. The following example is intended to help illustrate the impact of fees and expenses associated with an investment in Class K units of the Fund based on its TAOER. It is intended to illustrate the hypothetical cumulative expense that you would incur over various time periods if you were to invest \$10,000 in Class K units of the Fund. This example assumes that the Fund provides a return of 5% a year and that operating expenses of the Fund remain the same. The results apply whether or not you redeem your investment at the end of the given time period. Example Fees: 1 year - \$4.10; 3 years - \$12.92; 5 years - \$22.63; 10 years - \$51.46 The example outlined above does not represent the actual fees and expenses of the Fund. Actual fees and expenses may be higher or lower than those shown. Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions. **State Street regards the Fact Sheets in their distributed form to be complete documents that include material information regarding the Funds for investor consideration.
