## Sample Equity Fund Profile SA00

Release Date  
MM-DD-YYYY

### 1 Morningstar Category

The Morningstar Category is a system of grouping funds based on their actual investment styles as measured by their underlying portfolio holdings (portfolio statistics and compositions over the past three years).

### 2 Investment Strategy

The investment strategy describes the goal of the investment option, as well as how it directs investments to achieve this goal.

### 3 Volatility Analysis

Gives investors a sense of "best" and "worst" case scenarios based upon an investment's actual performance history. An overall risk assessment and its category average are clearly illustrated, while explanatory text explains an investment's price fluctuations relative to the market and other investments.

### 4 Portfolio Composition

Breakdown of the fund's portfolio holdings into general investment classes: Stocks, Bonds, Cash, and Other. It also includes the percentage of foreign stocks in the portfolio.

### 5 Top 5 Holdings

The fund's top portfolio holdings, listed as a percentage of total fund assets.

### 6 Morningstar Style Box™

The Morningstar Style Box reveals a fund's investment strategy as of the date noted on this report.

For equity funds the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For fixed-income funds, the vertical axis shows the credit quality of the long bonds owned and the horizontal axis shows interest rate sensitivity as measured by a bond's effective duration.

For corporate and municipal bonds, Morningstar surveys credit rating information from fund companies on a periodic basis (e.g., quarterly). In compiling credit rating information, Morningstar instructs fund companies to only use ratings that have been assigned by a Nationally Recognized Statistical Rating Organization (NRSRO). If two NRSROs have rated a security, fund companies are to report the lowest rating to Morningstar. If a rating is unavailable or unpublished, then the security or issuer is categorized as Not Rated/Not Available. US Government Securities issued by the US Treasury or US Government Agencies are included in the US Government category. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the fund. An NRSRO rating on a fixed-income security can change from time-to-time.

### 7 Morningstar Sectors

The Morningstar Sectors divide the economy into three primary sectors: the Information Economy, the Service Economy, and the Manufacturing Economy, in addition to 12 industry groupings.

### 8 Risk Measures

Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.

Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta).

Standard deviation is a statistical measure of the volatility of the fund's returns.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks long-term capital appreciation.

The fund invests at least 80% of its total assets in equity securities and up to 25% of the fund's total assets in equity securities of foreign issuers through ADRs and similar investments. It invests principally in equity securities of companies that the advisor believes have prospects for robust and sustainable growth of revenues and earnings. The fund may invest in the equity securities of companies of any market capitalization.

## Volatility Analysis

Risk: Above Average

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks conservation of capital, current income and long-term growth of capital and income.

The fund uses a balanced approach to invest in a broad range of securities, including common stocks and investment-grade bonds. It also invests in securities issued and guaranteed by the U.S. government and by federal agencies and instrumentalities. In addition, the fund may invest a portion of its assets in common stocks, most of which have a history of paying dividends, bonds and other securities of issuers domiciled outside the United States.

## Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks to provide investors with long-term capital appreciation.

The fund invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in securities of large-capitalization companies. The subadviser considers the term "large-capitalization" companies to generally refer to companies that, at the time of purchase, have a minimum market capitalization of approximately \$3 billion. It invests primarily in common stocks of U.S. large-capitalization companies.

## Volatility Analysis

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks to maximize real return, consistent with preservation of real capital and prudent investment management.

The fund invests at least 80% of its assets in inflation-indexed bonds of varying maturities issued by the U.S. and non-U.S. governments, their agencies or instrumentalities, and U.S. and non-U.S. corporations. It may invest up to 20% of its assets in non-investment grade bonds or securities of emerging market issuers. The fund maintains an average portfolio duration that is within  $\pm 40\%$  of the duration of the Bloomberg U.S. Treasury Inflation Protected Securities Index (the benchmark).

## Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks total return before fees and expenses that corresponds to the total return of the Standard & Poor's (S&P) 500® Index.

Under normal circumstances, the fund invests at least 80% of its net assets (including the amount of any borrowings for investment purposes) in common stocks that comprise the S&P 500 Index (the index). In seeking to match the performance of the index, the Investment Manager attempts to allocate the fund's assets among common stocks in approximately the same weightings as the index. The fund may invest in derivatives, such as futures (including equity index futures), for cash equitization purposes.

## Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks maximum long-term total return, consistent with reasonable risk.

The fund invests in the following four sectors of the fixed income securities markets: the U.S. investment grade sector, the U.S. high yield sector, the international developed markets sector, and the emerging markets sector. It normally invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in fixed income securities. The fund's investments in emerging markets will, in the aggregate, be limited to no more than 20% of the fund's net assets.

## Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks long-term capital appreciation and modest current income.

Under normal circumstances, at least 80% of the fund's net assets are invested in common stocks and other equity securities of mid-capitalization companies. It invests primarily in a concentrated number (generally 40 to 60) of mid-capitalization common stocks selected on a value basis and whose current market prices, in Heartland Advisors' judgment, are undervalued relative to their intrinsic value.

## Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

Out of 618 High Yield Bond funds. An investment's overall Morningstar Rating, based on its risk-adjusted return, is a weighted average of its applicable 3-, 5-, and 10-year Ratings. See disclosure page for details.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks to maximize long-term total return consistent with preservation of capital.

The fund pursues its objective by investing, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes in high yield bonds (commonly known as "junk bonds"), which are bonds rated below investment grade or unrated bonds determined by the Adviser to be of comparable quality. Under normal circumstances, the portfolio duration is two to eight years and the fund's dollar-weighted average maturity ranges from two to fifteen years.

## Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks maximum real return, consistent with preservation of real capital and prudent investment management.

The fund is a "fund of funds," which is a term used to describe mutual funds that pursue their investment objective by investing in other funds. It seeks to achieve its investment objective by investing substantially all of its assets in the least expensive class of shares of any actively managed or smart beta funds (including mutual funds or exchange-traded funds) of the Trust, or PIMCO ETF Trust or PIMCO Equity Series, each an affiliated open-end investment company, except other funds of funds.

## Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks maximum total return, consistent with preservation of capital and prudent investment management.

The fund invests at least 65% of its total assets in a diversified portfolio of Fixed Income Instruments of varying maturities, which may be represented by forwards or derivatives such as options, futures contracts, or swap agreements. It invests primarily in investment-grade debt securities, but may invest up to 20% of its total assets in high yield securities. It may invest up to 30% of its total assets in securities denominated in foreign currencies, and may invest beyond this limit in U.S. dollar-denominated securities of foreign issuers.

## Volatility Analysis

Risk: Below Average

In the past, this investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two-thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks to track the performance of the FTSE Developed All Cap ex US Index.

The fund employs an indexing investment approach designed to track the performance of the FTSE Developed All Cap ex US Index, a market-capitalization-weighted index that is made up of approximately 4,006 common stocks of large-, mid-, and small-cap companies located in Canada and the major markets of Europe and the Pacific region. The Advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

## Volatility Analysis

Risk: Average

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio makeups or investment strategies.

## Morningstar Risk

Above Average

## Investment Objective & Strategy

### From investment's prospectus

The investment seeks long-term growth of capital and income.

The fund normally invests at least 65% of its net assets (plus borrowings made for investment purposes) in common stocks and other equity securities (such as preferred stocks, convertible securities and warrants) of non-U.S. companies with market capitalizations greater than \$1 billion. It normally invests significantly in securities that the portfolio managers expect will generate income (for example, by paying dividends).

## Volatility Analysis

Risk: Above Average

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
